Steve

Just want to make sure we have are ducks in a roll.

Tank 16 work scope is:

Remove insulation in the required places

Install 9 patches over the areas found in inspection report.

Fixed roof replacement.

New stairway platform, and handrails.

Tank 12 work scope is:

Cone roof skin replacement.

Bottom and annular ring replacement

New Aluminum IFR

We would like to have a pre job meeting with as soon as possible to get everything ordered, get equipment ready with crews, and to verify everyone is agreed up-on scope.

The bids have been changed so many times I want to have it straight before we start. Please let me know when is the earliest we all can meet in Ingleside.

Tank 12 scan will be on its way

Bubba G

Have a great one!

Psalms 90:14 - O satisfy us early with thy mercy; that we may rejoice and be glad all our days.
